

Thanks to bostonbru for sharing the show at Dime.

bostonbru noted:

Pre-FM vinyl two-record set that I bought in a used record store, for US\$5, the DJ cue sheet was missing. Each disc was treated with Pfan-Stat No. SA-14, and the Discwasher Zerostat Positive Ion Gun prior to play. They were played on a Sony PS-LX300H turntable to a Sony RCD-W500C CD Recorder using the Super Bit Mapping function. The resulting CD-R was ripped with Exact Audio Copy. The waves were imported to Goldwave V.5.04 for pop/click fix, track separation, and fade in/out as needed. I only used one passive run of Goldwaves pop/click fix, since aggressive noise reduction can impair sound quality. The waves were then converted to flac level 8 with Traders Little Helper aligning all sector boundaries.

I removed all the commercials. I faded in on the intro voice over, and faded out on the end credits due to skips in the record.

A great show with all the live favorites and a cover of The Spencer Davis Groups' Gimme Some Lovin' which Chicago have never recorded. There are a few vinyl pops but not enough to take away from your listening pleasure, so enjoy!

Lineage:

Pre-FM Vinyl > CD-R > EAC (secure) > Goldwave v.5.04 > TLH > flac level 8 align all sector boundaries
