

Thanks to kingrue for sharing the show at The Traders' Den.

kingrue noted:

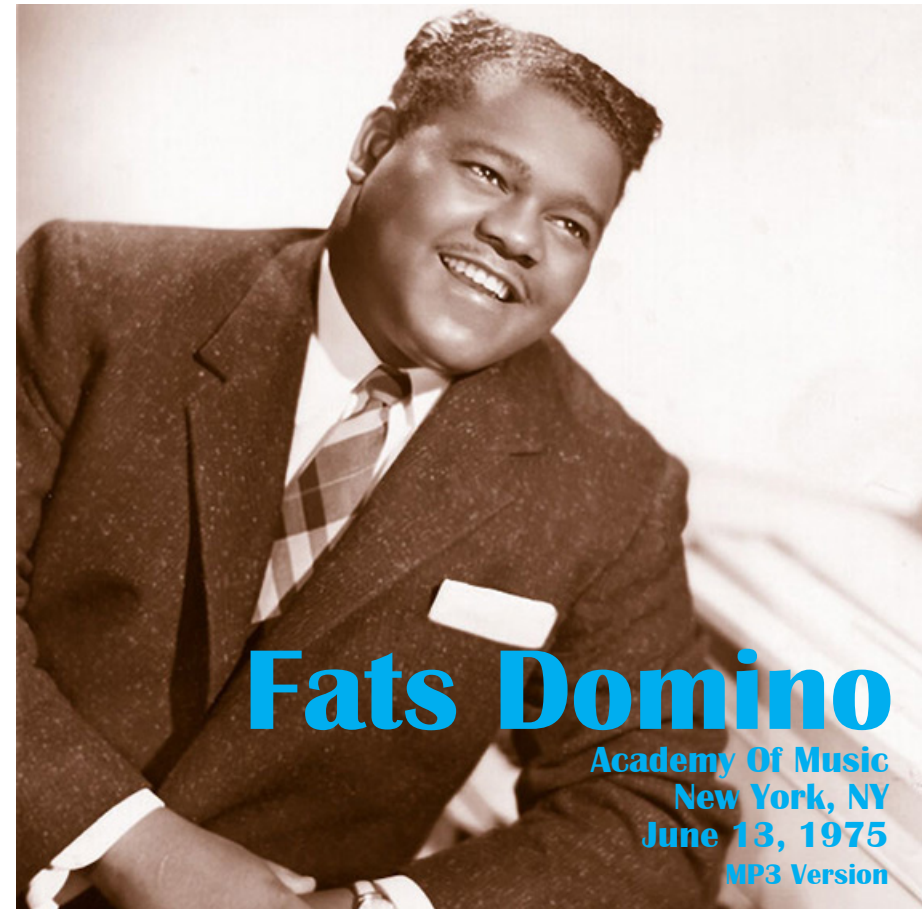

The transfer done by Jerry Moore needed some adjustments. The early show's playback volume was very low. I boosted the left channel +6 db and the right channel +10 db. The late show's playback was unbalanced. I lowered the left channel -1.5 db and boosted the right channel volume +2.5 db. Now both shows are equal volume. I also re-tracked a few of the songs and corrected a couple song titles. There is a tape stop at the end of track 111, which causes track 112 to start in progress. A little music missing. There is a tape stop at the end of track 202, which causes track 203 to start in progress. No music missing.
