

Thanks to nolataper for sharing the show at Dime.

Picture by Adam Kissick, posted at npr.org - Thanks!

nolataper noted:

Some editing done with Bias Peak Pro 6.2.0.21692: repairs.

This recording is primarily from the April 27 (first Sunday) rebroadcast; splices are from the original April 25 broadcast.

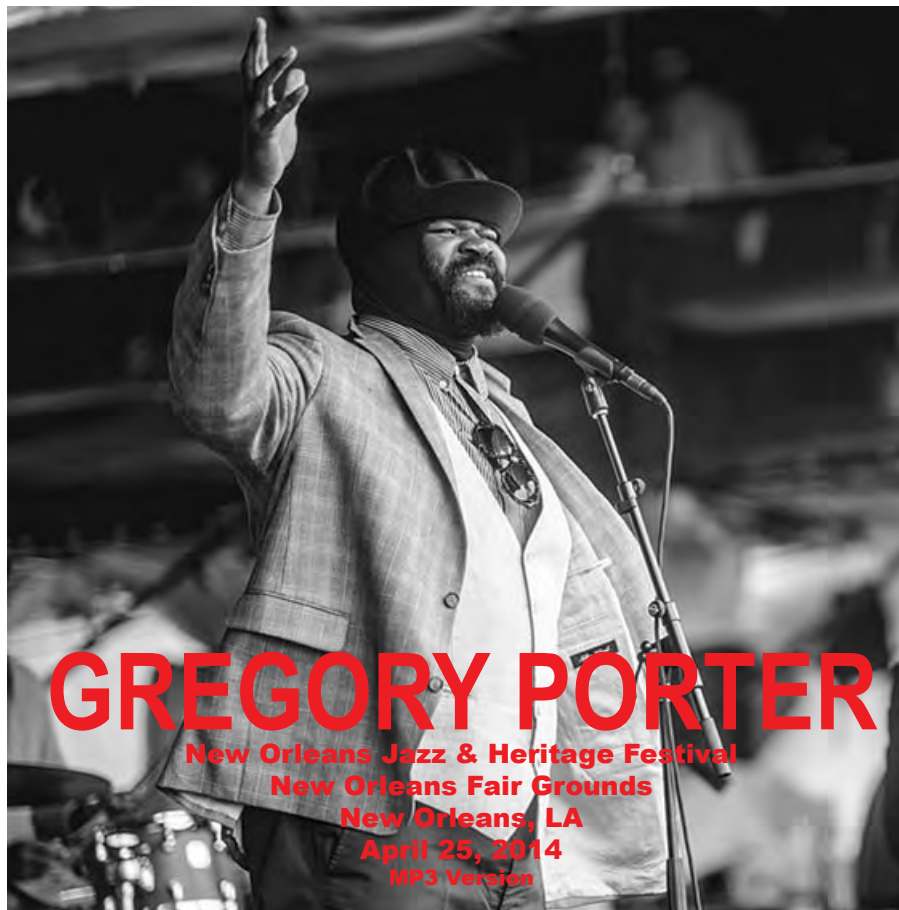

Editing notes:

- A 23-second splice from the original broadcast was used at 5:43 into Track 6 to replace a station ID.
- A 12.5-second splice also from the original broadcast was used to replace a 72-second station id (playback during rebroadcast was paused for the ID), beginning about 5:38 into Track 11
- The last 11 seconds is from the original broadcast.

A notch filter was applied using DSP-Quattro's Parametric EQ plugin at 3.6kHz and 7.2kHz, -10db, to reduce intrusive, high-pitched FM noise.

Lineage:

WWOZ-FM > RadioShark FM-receiver hardware > usb > Sony Vaio vpcs131fm (running Ubuntu linux) > Shark v1.0 (linux command line) > SoX v.14.4.0 > flac (level 8 compression) > scp copy 1 large flac file > MacBook Pro (2.5 GHz Intel Core 2 Duo) > SoX v14.4.0 > decompressed from flac to wav > DSP-Quattro 4.4 (trimmed, normalized by 2.4 db, split into songs) > aiff/wav > X Audio Compression Toolkit 2.36 (level 8 compression, sector boundaries repaired, tags applied) > flac
